edudip next - The webinar software with integrated meeting feature

edudip next impresses with simple handling, reliable technology and highest quality. German servers, the highest security standards and native-speaking in-house support round off the complete system and help you to achieve business success on all levels.

From small to medium-sized companies and large corporations, educational institutions or SaaS companies, the possible uses of the webinar software with integrated meeting feature are as diverse as they are promising. Whether for conferences or as a meeting tool, for employee and customer training, job interviews or the acquisition of new customers, the virtual meeting point ensures simplified collaboration through communication in real time and combines the advantages of presence meetings with the use of innovative technology.

Numerous moderator and participant functions including telephone dial-in and the use of a varied media mix enable a consistently individual and interactive webinar and meeting experience. The compatibility with all common browsers and operating systems ensures maximum flexibility.
